EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Terrence Brennan on December 10, 2003.

The application has been amended as follows:

A) cancel claims 1-10 and 21-24.

2. The following is an examiner's statement of reasons for allowance: The prior art discloses a sectioned conductor for stress forces and providing a conductive path between a rotor coil and radial stud in a power generator comprising a first sectioned member connected to a radial stud and a second member electrically connected to the first sectioned member and adapted to remain electrically connected when moving to the first sectioned member in response to stress forces in order to reduce internal deformation. However, the prior art fails to show, in combination with the invention that the first sectioned member has an axial portion adapted to be connected to the rotor shaft and to the radial stud extending into the rotor shaft and a radial portion extending outwardly from the

axial portion in a radial direction relative to the lengthwise extent of the rotor shaft and wherein the second sectioned member comprises a first end adapted to be connected to the at least one rotor coil and a second end through which a bore extends thereby defining a hollow conductor channel having at least three sides to at least partially receive the axial portion of the first sectioned member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
